DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mike Messina on 3/15/05.

The application has been amended as follows: In claim 2, please see attached page.

Allowable Subject Matter

2. ***Claims 2 and 7-10*** are allowed.
3. The following is an examiner's statement of reasons for allowance: None of the references used singularly or in combination teach or fairly suggest a passive matrix type LCD device having a controller for controlling the drive voltages applied to the common and segment electrodes, wherein the controlled voltage is varied, and wherein the drive voltages applied sequentially in time division to the common terminals in a manner such that the resulting voltage difference between all the common and segment terminals is zero in order to reduce unclearness in the displayed image. The combination of Endoh (U.S. Patent No. 5,218,352) and Chihara (U.S. Patent No.

Art Unit: 2675

4,196,432) teach the claimed limitation except for varying the controlled number. Also there fails to be motivation to combine the two references to result in the claimed invention being that Chihara teaches the LCD as an active matrix type LCD device. For these reasons the combination of the reference fail to read on the claimed subject matter. No other cited references make up for the deficiencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
